WORK EXPERIENCE

Incarnate (Pvt) Ltd.

Intern Software Engineer

May 2024 - May 2025

- Created wireframes and interactive prototypes using Figma, enhancing UI/UX quality and client satisfaction.
- Developed and maintained 7+ dynamic client websites and content management systems (CMS) using React, WordPress, PHP, MySQL, and JavaScript.
- Built responsive frontend applications using React.js and Tailwind CSS, improving usability and performance.
- Designed RESTful APIs for efficient data communication between frontend and backend systems.
- Managed domain email configuration using Zoho Mail for company and clients.

Tech Stack: React, PHP, Figma, MySQL, Tailwind CSS, JavaScript

EDUCATION

University of Westminster (UK) – Informatics Institute of Technology (IIT), Colombo.

BEng (Hons) Software Engineering Degree

Sep 2022 – present

Informatics Institute of Technology, Colombo.

Foundation Certificate in Higher Education - Software Engineering

Jan 2022 – Sep 2022

Taxila Central College, Horana.

G.C.E Advanced Level Examination (Biology Stream)

2021

SKILLS

Programming Languages:

- Java, C#, JavaScript, Python, PHP, Dart (Flutter), SQL, R

Frontend Technologies:

- React.js, HTML5, CSS, Tailwind CSS, Bootstrap

Design & Prototyping:

- Figma, Wireframing, Prototyping, User Flows, Responsive Design

Databases:

- MySQL, MongoDB

Frameworks & Libraries:

- React.js, Node.js, Flutter

Version Control & Deployment:

- GitHub, Netlify, Cpanel, Vercel

Other Software & Tools:

- WordPress, VS Code, IntelliJ IDEA, Android Studio, Visual Studio, XAMPP, Trello, Clickup

PROJECT EXPERIENCE

ClearSlipAI - Automated Receipt Authenticity Verification with Explainable AI & Forensic Analysis (Final Year Project)

2026

Developed an AI-based system to detect manipulated or fraudulent receipts using OCR, forensic image analysis, and deep learning. Integrated CNN classification with Grad-CAM heatmaps to provide transparent fraud detection results. Built a full-stack prototype that delivers a final verdict (Genuine/Suspicious) along with explainable insights to assist financial verification processes.

- Python, Flask, CNN, OpenCV, OCR, Grad-CAM, HTML/CSS, JavaScript

Movie Finder - A Simple Movie Search App

2025

Built a React-based movie search application integrated with the OMDb API. Implemented dynamic search functionality and API data handling using Axios. Designed responsive UI to display movie details including ratings and summaries.

- **React.js - Frontend**
- **Axios - API requests**
- **OMDb API - Movie database**

Crop Disease Detection using CNN - AI-powered Leaf Disease Classifier

2025

Developed a CNN-based model to detect plant leaf diseases from images. Built a Flask-based web interface for image upload and prediction display. Applied image preprocessing techniques to improve model accuracy.

- **Flask - Backend and web interface**
- **Python - Backend logic**
- **HTML/CSS - Frontend interface**

Invoice Generator - Web Application

2024

Developed a web application to create, manage, and generate printable invoices. Implemented backend logic using PHP and MySQL for secure data storage and retrieval. Integrated TCPDF for automated PDF invoice generation. Designed clean user interface for efficient business workflow management.

- **PHP - Backend**
- **MySQL - Database**
- **TCPDF - PDF Generation**

FitFlow - Machine Learning Based Mobile Application (Software Development Group Project)

2024

Collaborated in a team to develop a mobile fitness application with personalized workout recommendations. Integrated machine learning models to generate customized exercise plans. Built mobile frontend using Flutter and connected to backend services via Firebase and Flask.

- **Flutter (Dart) - Mobile App Development**
- **Python - Machine Learning**
- **Firebase - Backend**
- **Flask - Backend and web interface**

REFEREES

- **Ms.Imani Randhuli**

Lecturer / Module Lead – Professional Development
Informatics Institute of Technology
